

I support the upgrade of advanced class licenses in the Amateur service to the next level under the current licence restructuring.

Years ago I attempted to upgrade to the Extra class license but was unable to pass the code portion of the test. The practice in those days was to give the code test first and those that passed were then given the written portion. I am certain I would have passed the written portion.

Now that the code portion at 20 wpm is no longer required, it seems fair that the upgrade be made.

Additionally, upgrading Advanced licences would expedite moving to a three licence structure.
